lon-Hound

Handheld Ion Chamber

The Ion-Hound is a compact, portable, handheld ion-chamber that provides highly sensitive directional dose equivalent rate ($\dot{H}'(0.07)$) and ambient dose equivalent rate ($\dot{H}'(10)$) measurements from mixed radiation fields (beta, gamma, and X-ray radiation). The Ion-Hound utilises a 430 cm³ open air chamber, it is lightweight, easy-to-use and manufactured in the UK.

It provides dose rate measurement in six manually-selectable ranges with an effective range of 0.5 μ Sv/h to 500 mSv/h with optional real-time data streaming via the USB-C port. A built-in, full-colour, backlit LCD screen displays measurements and the instruments status. Ergonomically designed, with a robust housing and a handle for single-handed operation, the Ion-Hound features a familiar, industry-standard design, while adding additional connectivity and ease-of-use features.

It is an excellent like-for-like replacement for existing ion-chamber instruments, and is suitable for a range of application areas, including:

- Nuclear
- Defence
- Medical and Health Physics
- Research

Features

• Ionisation Chamber

With a large volume of 430 cm³ providing highly sensitive measurement, maintained at atmospheric pressure.

- Wide Energy Range Photons: 10 keV to 1.33 MeV, Beta: 200 keV to 2.0 MeV
- LCD Digital Display 3.5" screen with adjustable brightness.
- Re-calibration reminder when due
- User-replaceable foil windows

Aluminised foil windows are designed with easy field maintenance in mind.

• Downward-facing Beta Shield

The beta shield allows users to easily swap between ambient ($\dot{H}^*(10)$) and directional ($\dot{H}^i(0.07)$) dose equivalent rate radiation measurement qualities.

• Long Battery Life

Powered by 6 x 1.5 V C-cell batteries, the Ion-Hound offers up to 40 hours of use.

• Real-time Data Monitoring

Data readout through the USB-C port enables easy calibration and remote system monitoring.

User Interface

Intuitive user interface means the Ion-Hound requires minimal training for current users of ion-chamber instruments.

• Made in the UK

Designed, manufactured, and serviced in the UK for quick customer support.
