## OVERVIEW

The Beta Module provides operational dosimetry for hospital personnel, first responders, and radiation workers where there is a Beta radiation risk.

The add-on Beta Module attaches to the DMC 3000 dosimeter is able to measure  $Hp(0,07)$  radiation at a wide range of energy levels.

The  $Hp(0,07)$  and beta measurements, display and alarms are highly visible on the DMC 3000's LEDs and high contrast backlit LCD display.

Powered by the DMC 3000, the add-on module does not require any supplementary battery and remains operational over 1800 hours in continuous use. Calibration and functional parameters are stored in the module.
